Profile Summary

Motivated machine learning enthusiast with hands-on experience in developing and optimizing machine learning models. Skilled in data preprocessing, feature engineering, and model evaluation. Proficient in Python and machine learning libraries such as TensorFlow, PyTorch, and Scikit-learn. Seeking a Machine Learning Engineer position to contribute to cutting-edge ML projects and expand knowledge in model development and optimization in a collaborative environment.

Technical Skills

- Programming Languages: Python
- Libraries/Frameworks: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- Machine Learning: Supervised and unsupervised learning, feature engineering, data preprocessing, model training and evaluation

Education

MS in Artificial Intelligence – National University of Science and Technology (NUST), Islamabad

09/2021 – 10/2024 | 3.4 CGPA

- Relevant coursework: Machine Learning, Deep Learning, Natural Language Processing
- Thesis: Automating Legal Text Summarization with Multi-Agent Systems and Human-Centered Evaluation.

BSc. in Computer Engineering – Bahauddin Zakariya University, Multan

09/2015 – 07/2019 | 3.1 CGPA

Research and Work Experience

Research Student

TKUL Lab, NUST – Islamabad | 11/2023 – 10/2024

- Developed a multi-agent system for automating legal text summarization using CrewAI, with automated evaluation through ROUGE and BERTScore.
- Conducted human-centered evaluation to ensure accuracy and relevance of the summaries.

Online Tutor

Preply | 07/2022 – Present

- Tutor students in artificial intelligence, focusing on coursework related to machine learning and deep learning.

Lab Manager

NCAI Deep Learning Lab, NUST – Islamabad | 06/2022 – 08/2023

- Managed undergraduate summer internships, providing guidance on machine learning projects.
- Presented lab projects to visitors, showcasing advancements in machine learning and AI technologies.

Projects

- Customer Service Requests Analysis
- Smartphone Price Prediction
- Sentiment or Satisfaction Analysis
- Finetuning BERT (both base-cased and uncased versions) to perform Named Entity Recognition (NER) on legal judgments.
- Finetuning Longformer Encoder-Decoder (LED) models for summarization of legal judgments.
- Automating Legal Text Summarization with Multi-Agent Systems and Human-Centered Evaluation.

Certifications

- Programming for Everybody (Getting Started with Python) (Coursera)
- Python Data Structures (Coursera)
- Machine Learning Specialization (Coursera)
- Structuring Machine Learning Projects (Coursera)
- Neural Networks and Deep Learning (Coursera)
- Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization (Coursera)
- Sequence Models (Coursera)
- NLP Course (Hugging Face)
- Generative AI with Large Language Models (Coursera: In Progress)
- Building AI Agents (Campus X)
- Multi AI Agent Systems with crewAI (DeepLearning.AI)

Key Strengths

- Strong understanding of machine learning algorithms, data preprocessing, and feature engineering.
- Hands-on experience with frameworks such as TensorFlow, PyTorch, and Scikit-learn.
- Knowledge of deep learning architectures and model evaluation techniques.
- Effective communicator with strong collaboration skills in a team environment.
- Self-motivated and eager to learn and grow in the machine learning field.
